1. Claims 17-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. The instant claims recite amounts of the polyester forming monomers in mole percentages. However, it is unclear what these mole percentages are based on, e.g. the totality of the monomers, the acid component, the alcohol component, or some other basis.

2. Claims 17-54 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Wegner et al. is the closest prior art seen by the examiner. However, this reference fails to teach the use of the instantly claimed polyurethane acrylate and there is not proper motivation to use such a polyurethane acrylate with the instantly claimed components.
